Dr Medy Zarrebini
PFE Ltd, Shroggs Road
Halifax, Yorkshire HX3 5HL

1st May 2023

His Excellency Mohsen Baharvand and Dr Medy Zarrebini

This is my second letter of introduction to the government of Iran, the first is recorded on enclosed CD/ USB stick and informs the reader as to Dr Medy Zarrebini providing me with employment opportunity that put me on an engineering career path taking me to Brazil and their aerospace industry.

Last year I introduced four dossiers and associated artworks grouped under the collective heading **'Establishing Embassy to Significant Religious Object(s) Ark of the Covenant, Holy Grail and Caravan of Treasures'**, titled **'Lifting the Veil; Camaialot; Grail Technologies; The Anunnaki Conquest of the Free World'**. These have now expanded to include *Camaialot B* and *Anunnaki Conquest C* dossiers are available for viewing at website www.apollobath.org - link - **Crown Office and Embassy**, due to their content dossiers *Anunnaki Conquest B & C* are not available via website but included on enclosed CD.

Dr Zarrebini employed me at his Halifax synthetic fibre factory in 1994 following my replying to his job advertisement seeking a Design Engineer in newspaper The Yorkshire Post, at the time I was a recent unemployed MSc graduate from the Napier University of Edinburgh cohabiting with a Scots lady in Wakefield. Pursuing ambition in the offshore oil industry I resigned from the opportunity Dr Zarrebini had provided so as to raise funds for a course in well drilling at a specialized Montrose academy via temporary employment as a CAD contract engineer. However, the lucrative salary provided through CAD contracting re-directed my ambition and five years after Dr Zarrebini had taken me off unemployment benefits I was living in Brazil having sold a London apartment. The profits of sale being directed into developing Product Data Management (PDM) software of my own design – CAD-Collaborate TM – intention being international communication of engineering projects, see curriculum on enclosed CD.

Dr Zarrebini was pleased with the work I completed as to plagiarising an Italian designed item of synthetic fibre production line machinery known as a Crimper. The project he had set me prior to my resignation was a second task in plagiarising and that of an Autoclave – a pressurized oven used to clean synthetic fibre extrusion equipment from polyethylene plastic deposits.

I returned from Brazilian life as an ocean wave surfer of professional stature and have expressed my concern for plastic pollution in video *'Ice Maidens of Atlantis – Pammy's Midway Nightmare Too'* available for viewing on enclosed CD. Chapter 15 of dossier *'Camaialot A'* introduces deceased childhood friend Philip Wigglesworth whose guidance in Los Angeles 1998 gifted a love affair that took me to Brazil. Philip's career was with BP as a merchant navy officer employed in shipping of natural gas.

British Petroleum commenced existence as the Anglo-Persian Oil Company and Google informs:-

Why did Iranians grow to resent the Anglo-Iranian Oil Company?

Iran's subsequent alienation from the West (beginning in 1979), which owes much to how the Anglo-Iranian Oil Company profited from exploiting Iran's oil over many years, can be attributed in part to the irresponsible way that a "game" was played in other people's territory, with little thought to what the consequences.

Dossier '*Camaialot A – Chapter 8 Power in Plastic*' promotes the technology of Plastic Pyrolysis and Anglo-Spanish company www.plasticenergy.com who utilise a process that includes a pressurised furnace not too dissimilar to the autoclave that once sat in Dr Zarrebini's Yorkshire factory.

I personally do not hold political ambition preferring the pursuit of freedom to power and invite Iranian review of '*Camaialot B – Chapter 3 Islam's Fallen Star and the Glastonbury Zodiac* and *Chapter 8 Principal Storylines of Apollobath TV*'

I hope Dr Zarrebini and family are keeping well, I recall them holidaying every summer in Portugal where I have since surf travelled and have been witness to ocean plastic pollution. Maybe an Anglo-Spanish-Iranian-Brazilian partnering could kick start a much needed world harvesting of plastic waste.

My plans this summer are to visit both Yorkshire and Scotland in a small motorhome, see '*Camaialot B – Chapter 2 'The Oldest Story Ever Told and Stargates Phoenix and Pennine*' and also dossier *Grail Technologies*.

I am sending this letter to the business address provided for Dr Zarrebini's PFE Ltd, a retail park now stands where his factory once stood. If Iranian government and/ or Dr Zarrebini would like to meet me in person I am best contacted via the email address below.

This correspondence shared with:-

- The Masonic Lodges of Ilha Santa Catarina Brazil and Johannesburg SA
- Station Commander of RAF Molesworth, England
- The Chinese Embassy of Edinburgh
- The Scottish National Party
- Vice Chancellor of Cambridge University

Kind regards

Graeme Parker
