

Prince Richard - Duke of Gloucester Colonel in Chief of the Royal Anglian Regiment

Dear Prince Richard

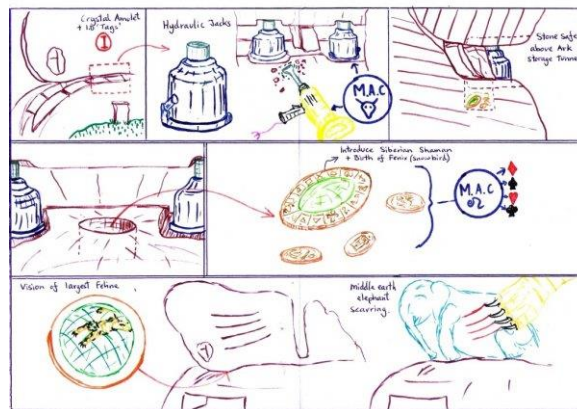

Lincoln Cathedral

A resident of Huntingdon I have learnt that Oliver Cromwell was responsible for removing the brass flooring from Lincoln Cathedral, his reason for doing so I believe being that a fragment of 'Grail Rock' is buried beneath this magnificent house of God and Tartar Empire.

I wish to invite your viewing of promotional music videos 'As Surfistas da Roda – Dagon's Deal' and 'Ice Maidens of Atlantis – Lincoln Fields'

Alongside the cave containing 'The Sword in the Stone' is a safety deposit box that perhaps contains a Crystal Amulet and Identity Medallions of the Prince's associated with the closing of an entrance to a Saxon Kingdom of Middle Earth.

Archaeological discoveries proposed dramatization includes featuring the 'Death of Batraz' a Siberian Shaman and his Horse dying alongside the Ark of the Covenant and riding a Dragon to Middle Earth to assist construction of a Silver Castle.

Catherine of Aragon, buried in Peterborough Cathedral, identified herself with the Castille Leon heraldry and perhaps on opening this ancient safety deposit box a hidden history of castles and lions will reveal the true purpose behind Catherine's marriage to the house of Tudor.

Hollywood cinematic productions have a fine tradition of military units assisting film making and invite your consideration as to The Royal Anglian Regiment taking a part in replacing the brass flooring of Lincoln Cathedral and receiving possession of a copy of a guide to the Holy Grail's storage location in the Pennine Mountains.

Yours truly and sincerely

Graeme Parker of Huntingdon, 2020
